

NEW FOR 2018

Thanks to a new program through the state of NH, students can take up to

2 STEM

STEM = science, technology, engineering and math

courses per year for FREE!

The Governor's Dual and Concurrent Enrollment program pays the tuition, making it more affordable than ever for students to earn college credit and get a Running Start on a college education. Scholarships available for Early College courses too!

Here's how it can work:

- 1** Through Running Start, Student A takes 2 dual credit STEM courses in 11th grade, free of charge, and 1 non-STEM course for \$150.
- 2** In 12th grade, Student A takes 2 STEM courses free of charge and 1 non-STEM course for \$150.
- 3** Student A will graduate high school with more than a semester's worth of college credits, for just \$300.*

"I encourage all New Hampshire high school students to take advantage of this amazing opportunity by taking dual credit courses through NH Community Colleges, including free courses in science, technology, engineering and math. It is a great way to make college more affordable for New Hampshire families and gain skills for the 21st century."

- Chris Sununu, Governor of New Hampshire
