

VENTILATION REPORTS

Here are links to the recent ventilation reports for our 3 school buildings:

1. (READ FIRST) - Updated [Local Report](#) on Findings and Repairs
2. Mechanical [Report on GMS](#)
3. Mechanical [Report on LMS](#)
4. Mechanical [Report on CHS](#)

Please note that these links lead to technical reports intended for school planning. They are not "air quality" reports. Questions or concerns should be brought forward to Dave Ross, Facilities Director, Cory Izbicki, Business Administrator, or Mike Jette, Superintendent.

Updating the ventilation system in each school continues to be a priority for the Litchfield School District. It is our intent to maintain our systems according to code. With the audit reports completed this summer, and repairs that have already been made, each of our ventilation systems is currently in better working condition for the upcoming 2020-2021 school year than in previous school years. While some aspects of the system are noted as "beyond useful life", this is mainly related to the controls systems. Until the controls are updated, we will continue to make manual adjustments as needed.
